Innefu: Security, Analytics, and Intelligence

Experienced cybersecurity professional adept in OSINT techniques and proficient in Maltego, a powerful data mining tool. Skilled in gathering and analyzing open-source intelligence to uncover valuable insights for threat assessment and proactive defense. Proven track record in leveraging Maltego for comprehensive profiling and bolstering organizational security measures.

@innefu

Projects

Institute of professional studies (College Website)

Proficiently architected and deployed a dynamic collegiate website, integrating a user-centric Content Management System (CMS) with seamless front-end rendering using EJS, while harnessing the robust capabilities of Node.js/Express.js to deliver a highly responsive and feature-rich back-end functionality

[Github Link](#)

HTML & CSS Project(Sandboxes)

16 Sandboxes project(1 to 15 live class project) given by Hitesh Choudhary. Make this project using HTML ,CSS & JavaScript to design this web page and also publish project using netlify website hosting service .

[Github Link](#)

ColorBar (Color-Picker) website

Developed a web-based color picker tool using HTML, CSS, and JavaScript that allows users to select colors using various input methods and obtain their corresponding color codes. Also integrated the clipboard API to enable users to easily copy and paste color codes
